Thermokote

Associated with High Temperatures

HIGH TEMPERATURE COATINGS

The corrosion protection of high heat areas associated with high temperature is the perennial problem to the Industry. Monarch ThermoKote range High Temperature Coatings protect the steel structural against atmospheric corrosion and under insulation corrosion up to 810°C (1490°F). The coatings can even be sprayed to hot surface till 120°C (248°F). The excellent resistance to thermal shock as a result of rapid temperature cycling, extend life expectancy of assets.

Applications: Chimney, Oven, DG set, Exhaust stack, High heat areas, Corrosion under insulation.
